

Below in the folder 'unifor' I am adding to a Bootscrap website, but I am adding a VisualNeo Web page as a subfolder.

Structure of VisualNeo 'unifor' folder

Page in VisualNeo page using link to view/download each of the 3 files.

	Help-Sheet-Writer.pdf	4/15/2026 4:52 PM	Adobe Acrobat D...	80 KB
	Session-1-Summary-March4-2026.pdf	3/9/2026 9:19 PM	Adobe Acrobat D...	66 KB
	Session-2.pdf	4/15/2026 4:48 PM	Adobe Acrobat D...	472 KB

Code to download the files using the links

```
1 <table class="center">
2 <tbody>
3 <tr><td><a href="../../downloads/Session-1-Summary-March4-2026.pdf" target="_blank">Session 1 - Summary</a></td></tr>
4 <tr>
5 <td><a href="../../downloads/Session-2.pdf" target="_blank">Session 2 - March 25</a></td>
6 </tr>
7 <tr>
8 <td><a href="../../downloads/Help-Sheet-Writer.pdf" target="_blank">Session 3 - Help Sheet Writer</a></td>
9 </tr>
10
11 </tbody></table>
```

Works in development, but when uploading the my website, it says can't find file. The same files are on upload folder and on the server. Don't know why I am having this problem.
